

Hand Hygiene

**Simple.
Effective.
Easy.**

- Wash your hands often with soap and water for at least 20 seconds – that’s about the time it takes to sing the OC fight song or a round of Happy Birthday.
- Use an alcohol-based hand sanitizer that contains at least 60% alcohol if soap and water are not available.
- Hand sanitation stations are in campus building entrances.
- Perform hand hygiene frequently, including before eating, after using the restroom, after touching your face covering or face, when entering common spaces, and while using shared workspaces, electronic devices, equipment or other tools.
- Additional hand hygiene protocols, including the wearing of gloves, may be required in various campus settings, as appropriate.
